OEM
SOLUTIONS

The expertise of an industry leader, the attention of a partner

Our extensive know-how is at your service to meet all your needs for Openings, our historical market, in which POMMIER has become the reference.

Our most important asset: our Design Office, which can take into account even the most specialised needs, and an OEM Solutions team that works closely with you throughout your projects.

WHAT WE CAN OFFER YOU

TAILOR-MADE SOLUTIONS

Our solutions are custom designed and geared toward the intended use, the vehicle type and the vehicle body. They're adapted to your specific design and assembly requirements. They take into account the expectations of your customers, to ensure seamless integration on your vehicles. Each design can be personalised and adjusted as necessary: specific linkages, optimisation of materials, etc.

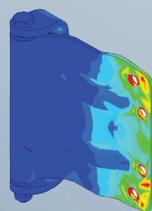

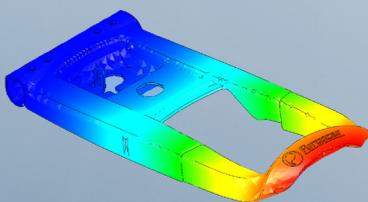

TIME-TESTED SOLUTIONS

All our products are tested in compliance with the currently enforced standards (EN 12642, codes L and XL) and to our own specifications as well. The openings are tested by external laboratories such as TÜV and CRITT, and by other specialised laboratories for certain products.

We check:

- their durability (opening/closing cycles);
- their strength (thrust testing);
- their corrosion resistance (salt spray resistance).

And finally, before being placed on the market, our products undergo field tests to ensure they comply with their working environment.

SOLUTIONS THAT REFLECT YOUR CORPORATE IMAGE

We design one-of-a-kind products bearing your logo, adapted to your colours and/or your individual specifications.

This enables our Openings accessories to promote your image while maintaining the aesthetic aspects of attractive vehicle bodies.

RESPONSIBLE SOLUTIONS

We reduce environmental impacts by integrating eco-design concepts and life cycle monitoring throughout the development phase of our products. Many of our products also comply with the PIEK standard for use in urban environments (noise level below 60 decibels).

Our wide range of expertise is at your service

At POMMIER, you can benefit from our in-depth knowledge of accessories and equipment in 5 product universes to optimize the performance levels of your vehicle.

Cabin handles
P65

Locking gear handles
FURGOCAR TWIM

Stainless steel hinges
FURGOCAR HK

Curtain tensioner with ratchet

Magnetic door retainer

Ventilation door
OXZY

Stainless steel locking gear

FOCUS ON

QWIDO DYNAMIC DOOR RETAINERS

Designed to optimise operations during docking and departures, this patented dynamic door retaining system enables vehicles to drive slowly with the doors open when at logistics depots.

Thanks to its robust and clever design, its ergonomic features and a selection of materials to easily identify the product, even during night operations, our system provides the operator with greater comfort and operational safety, while saving time when operating the doors.

Ready to meet all of your needs

FOR YOUR MANUFACTURER

YOUR TOP PRIORITY IS RELIABILITY.

The durability of our products has been proven and tested.

YOU WANT TO SAVE TIME.

We remain focused on the "installation" aspects, offering simple and quick assembly solutions.

YOU CARE ABOUT THE ENVIRONMENT.

To reduce noise pollution, we minimize the noise levels of our products.

YOU WANT VEHICLES THAT REFLECT YOUR CORPORATE IMAGE.

Our designs will enable you to be a difference-maker.

YOU WANT TO IMPROVE PRODUCTIVITY.

We include costs in all the development phases of our products.

FOR YOUR CUSTOMER OPERATORS

- MORE **USER-FRIENDLY** AND **EASIER** TO USE.
- GREATER **SERENITY** FOR CARGO TRANSPORT.
